

“Providing a Balanced Approach to Natural Resource Management”

Northwest Management, Inc., a full-service natural resource consulting firm based in Moscow, Idaho, is seeking resumes from motivated individuals looking to work in a high-impact field of innovation and technology.

Position: Natural Resources GIS Technician

Status: Regular hourly non-exempt

Rate of pay: \$23.00 - \$27.00 per hour DOE

Time Frame: Open until Filled

Location: This position will report to our corporate office in Moscow, Idaho. Regular work will occur within the Moscow office. There will be occasional remote-work assignments, dictated by project needs across the continental United States.

Duties: The **Natural Resources GIS Technician** will be experienced in collection and entry of natural resources field data with experience processing, analyzing, and applying these data at a team and project-operation level. Responsibilities include supervision, delegation, planning, training, performing quality control, and client interfacing.

- Apply skills in ESRI suite of GIS software including ArcPro, AGOL, ArcGIS enterprise, Field Maps and other data handling software to quality-check field data and other tabular data used in tracking projects and developing products for clients.
- Interface with GPS systems (Trimble, Javad etc.), handheld data recording hardware (Nomad, Tablets, Android, etc), and other field equipment for team operations.
- Required to spend up to two (2) plus weeks in the field at a time with minimal supervision collecting field data, performing highly detailed field audits of contractor and sub-contractor work, and project tracking anywhere in or out of the continental USA.

Minimum Qualifications:

- B.S. degree or Associates degree with post-graduation experience in a natural resources discipline, GIS, remote sensing, civil engineering, applied statistics, or related field.
- Demonstrated skills in ESRI Suite, Microsoft Office suite, GPS equipment operation, and hardware/software interface experience.
- Experience in the collection of field inventory or survey-quality GPS field-location data.
- Some supervisory and training experience.
- Possess a valid driver’s license and valid United States passport or ability to obtain within 6 months of hire.
